DO YOU HAVE PARKINSON'S DISEASE?

Researchers at Boston University are seeking **adults between the ages of 18 and 100 years with Parkinson's Disease** to participate in research studies to find new objective measures and treatments for sensorimotor disorders.

What's involved?

You may be asked to:

- Produce speech
- Voluntarily contract your hand, arm, neck or facial muscles
- Produce dry swallows
- Fill out motor function and quality of life scales
- Listen to and rate speech samples

The following types of data may be collected:

- Acoustics using a microphone
- Surface electromyography to detect electrical signals from your muscles non-invasively from the surface of the skin
- Body movement and force

Participants will be asked to come in for 1 – 10 sessions no longer than 3 hours each and will be compensated \$10/hr. Please email **stepplab@gmail.com** for more information about ongoing studies.
