

Nutrition, Exercise, COVID-19 and Parkinson's Disease

Attention those living with Parkinson's disease and their informal caregivers. Be part of an important research study.

Are you at least 18 years of age?

Have you been diagnosed with Parkinson's disease?

Are you an informal caregiver for a loved one with Parkinson's disease?

The purpose of this research study is to understand how the COVID-19 pandemic has impacted food access and intake, physical functioning and disease burden for people living with Parkinson's disease and informal, unpaid caregivers for a loved one with Parkinson's.

This study will take roughly 30 minutes and include an online survey via Qualtrics. Study will be conducted at Rowan University via online survey. For a link to the surveys contact the Principal Investigator, Dara LoBuono, at lobuono@rowan.edu
