

wAID-P Study

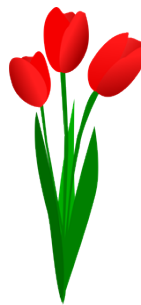

Study Basics:

- 2 testing sessions at Beth Israel Deaconess Medical Center
- Baseline and one year later (12-18 months)
- Testing days include MRI, cognitive motor testing, physical exam, and questionnaires
- \$150 stipend for each visit

Looking for participants who:
Have Parkinson's Disease, Multiple System Atrophy,
and Progressive Supranuclear Palsy

Principal Investigator:

- David K. Simon, MD, PhD

Did you know?

The tulip is the symbol of the Parkinson's Disease Foundation. A variety of tulip was actually named after James Parkinson, the doctor for which the disease is named.
