

Brain Imaging Research Study

Researchers from Neuroscience Institute at the NYU Grossman School of Medicine are seeking

patients with Lewy Body diseases for imaging research on visual hallucinations

These researchers are using non-invasive brain imaging (e.g. MRI) techniques to better understand the neural basis of visual hallucinations in Lewy Body diseases.

Eligibility Criteria:

- **Diagnosis of a Lewy Body disease (including Parkinson's disease, Parkinson's disease dementia, and dementia with Lewy bodies)**
- **Recurrent experience of visual hallucinations***
- **18-90 years of age**
- **Fluent in English or Spanish**

*if you do not have visual hallucinations, but you have a diagnosis of a Lewy Body disease, you may be able to participate in our study in the control arm.

Compensation will be provided for study participation.

Insurance is not necessary.
